

COLOR THEORY

Color is one of the
Elements of Art

LESSON OUTLINE

01

The color wheel

02

Primary, Secondary and
Tertiary colors

03

Warm and cool colors

04

Hue, value and saturation

05

color wheel, who Am i?

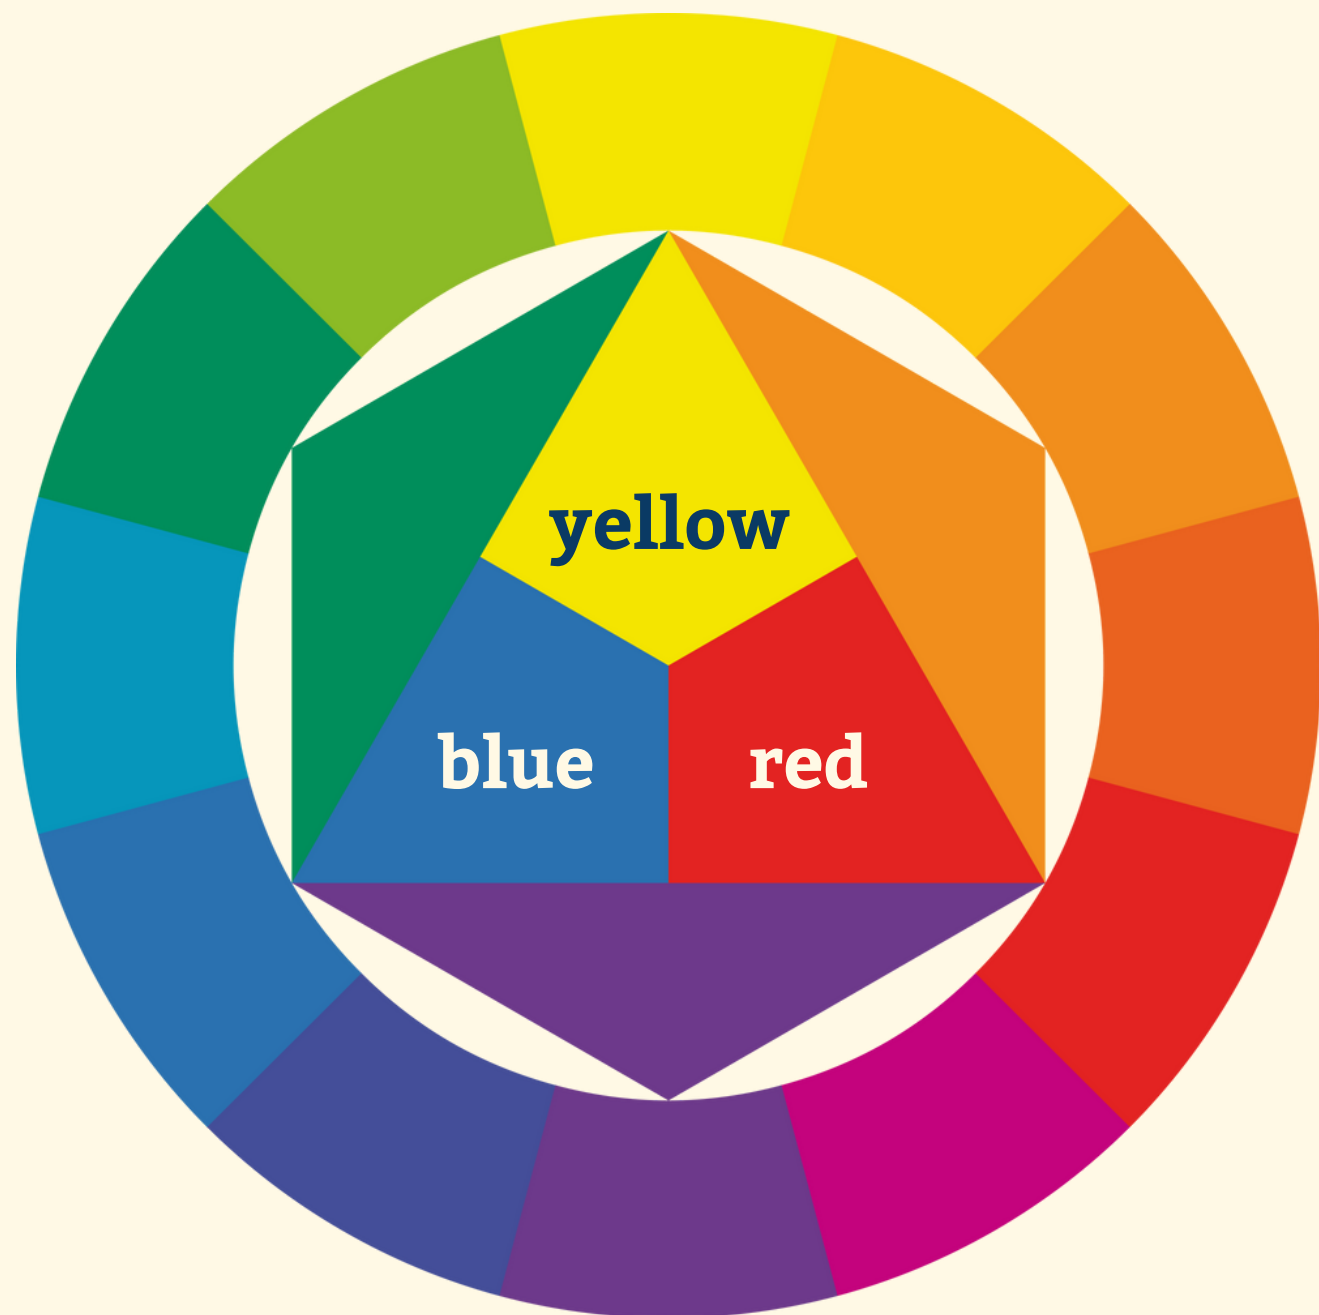

THE COLOR WHEEL

It shows the connection between colors and organizes these colors into groups.

Did you know? Another word for color is 'hue.' So in this color wheel, we can see many different hues!

We can see primary colors on the color wheel.

Red

Blue

Yellow

You use these colors to make all other colors.

Yellow

Red

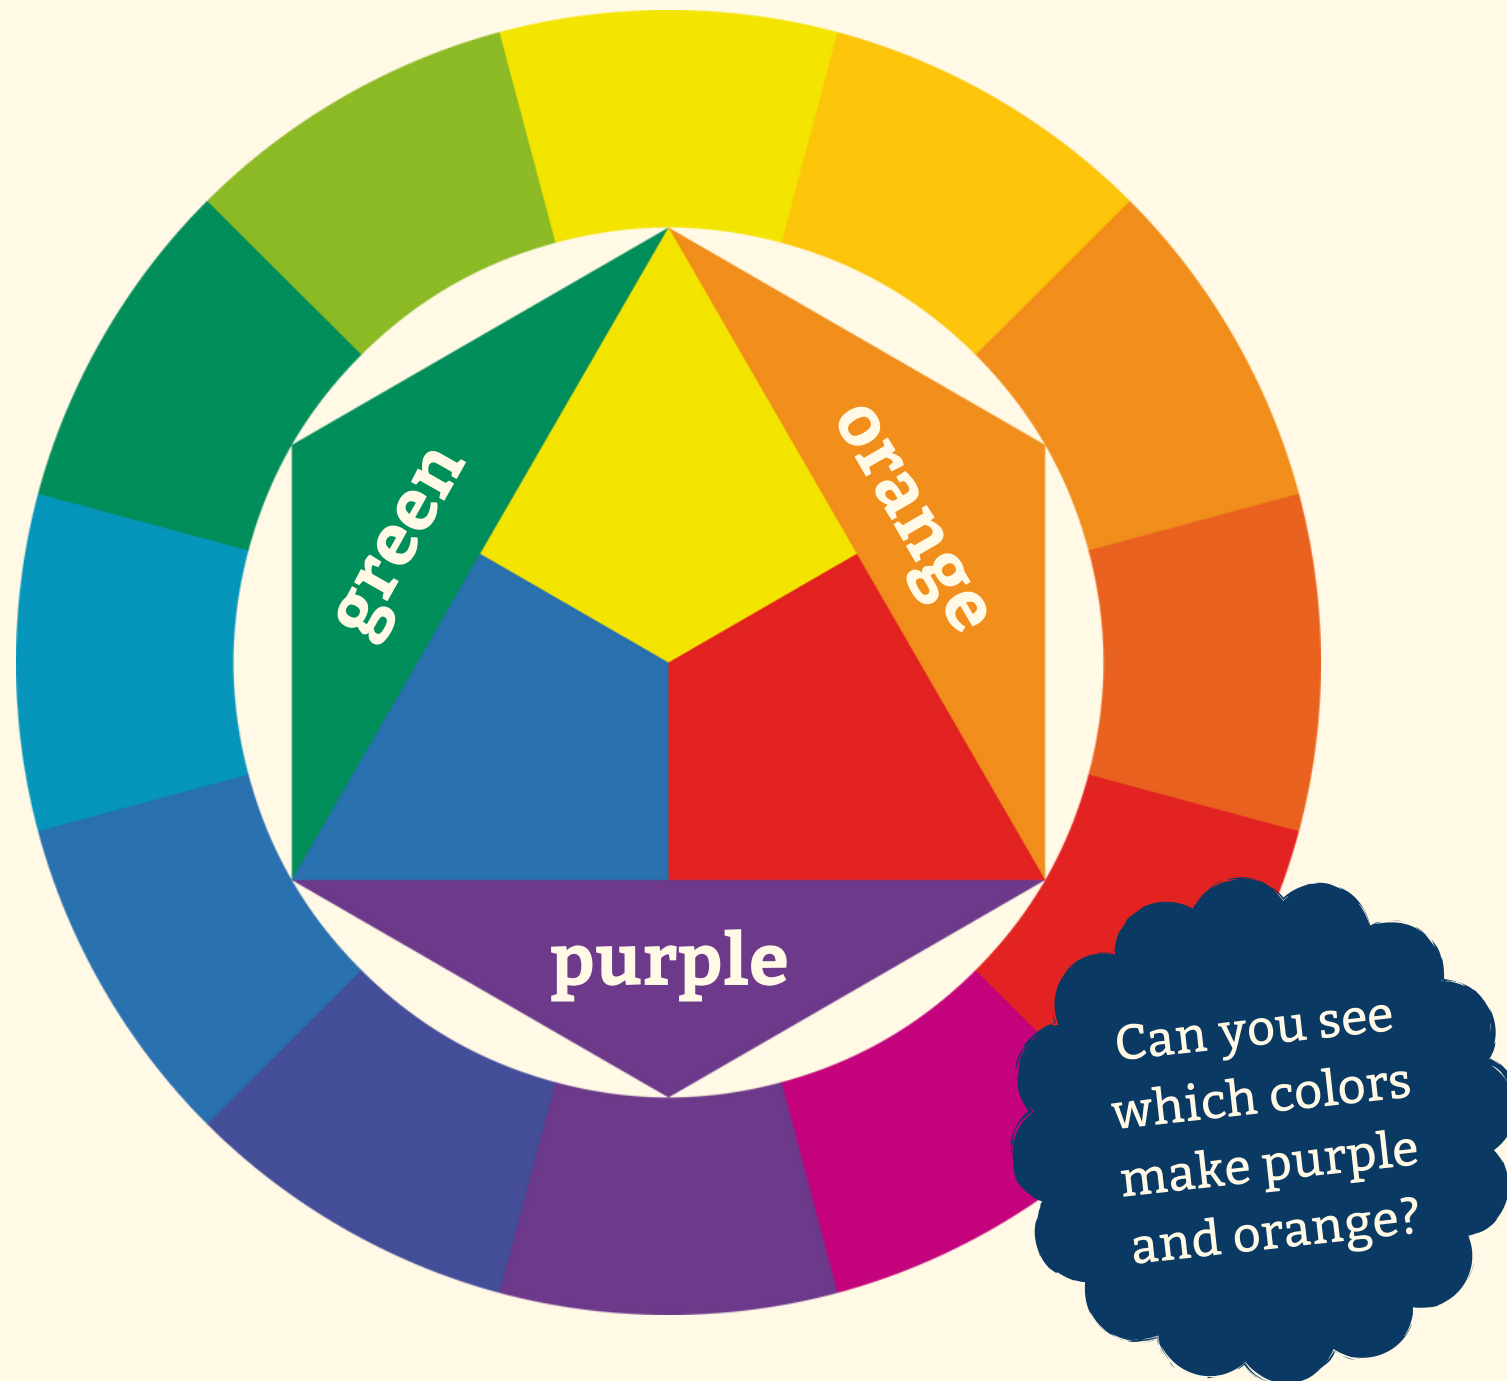

Blue

Primary colors

We can see secondary colors on the color wheel.

Purple

Green

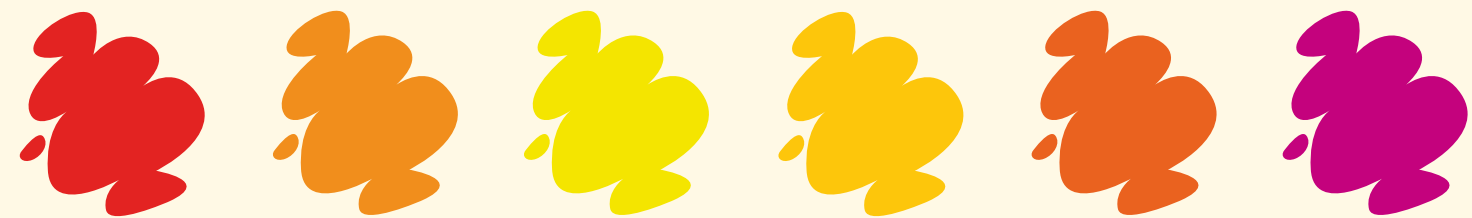

Orange

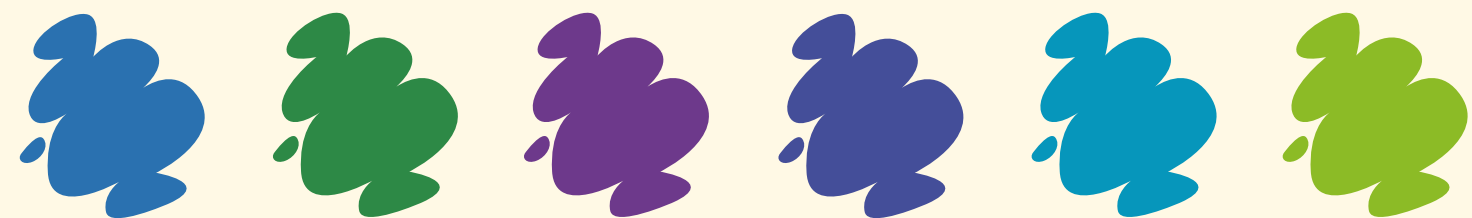

The color wheel shows us which primary colors mix to make a secondary color. For example,

$$\text{Blue} + \text{Yellow} = \text{Green}$$

WARM AND COOL COLORS

Warm colors are red, yellow, and orange, and colors they are connected to in the color wheel.

Cool colors are blue, green and purple and colors they are connected to in the color wheel.
